

UNIT 4 - LESSON PLANS

Class Math 5

Topic Fractions in Real World
(Addition and Subtraction)

Lesson 6 **Of** 6

Objective

Students will:

- Represent problems using block models.
- Apply addition of fractions in solving word problems involving fractions.
- Apply subtract of fractions in solving word problems involving fractions.
- Represent problems using equations.
- Find the unknown fraction and assess whether answer is reasonable.

"I Can" Statement

I can represent problems using block models.

I can apply addition of fractions in solving word problems involving fractions.

I can apply subtract of fractions in solving word problems involving fractions.

I can represent problems using equations.

I can find the unknown fraction and assess whether answer is reasonable.

Common Core Standards

[CCSS.MATH.CONTENT.5.NF.A.2](#)

Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers.

For example, recognize an incorrect result $2/5 + 1/2 = 3/7$, by observing that $3/7 < 1/2$.

Bell Work

See Bell Work 4-6

Procedures

1. Start and lead student discussion related to the bell work.
2. Distribute the Guided Notes
3. Present lesson or play a video lesson.
4. Use an Online Activity if time permitted.
5. Distribute Lesson Assignment.

UNIT 4 - LESSON PLANS

Assessment	
	Bell Work 4-6
	Assignment 4-6
	Exit Quiz 4-6
