

# Classifying 2-Dimensional Shapes

Exit Quiz  
Math 5

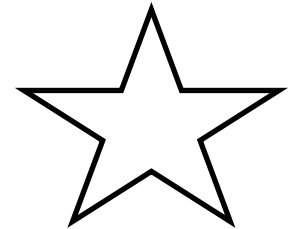

**TRUE** or **FALSE**

Color the  **RED** if the statement is **TRUE**, and **BLUE** if the statement is **FALSE**.

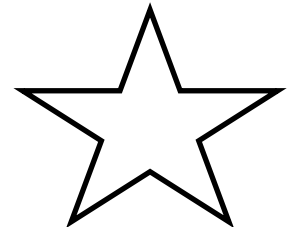

1. An equiangular triangle can have one obtuse angle.

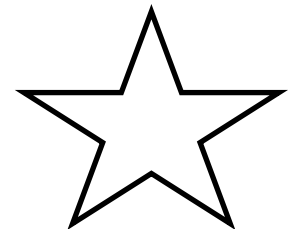

2. A triangle can have at least 2 acute angles.

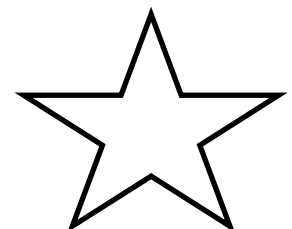

3. An equilateral triangle is also equiangular.

4. A trapezoid has one pair of opposite sides that are parallel.

5. A scalene trapezoid can have right angles.

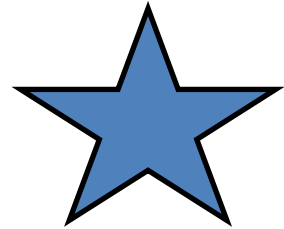

# Classifying 2-Dimensional Shapes

Answers:

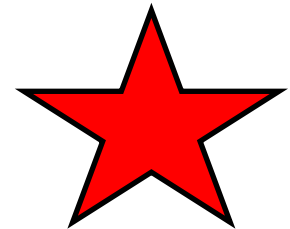

**TRUE** or **FALSE**

Color the  **RED** if the statement is **TRUE**, and **BLUE** if the statement is **FALSE**.

1. An equiangular triangle can have one obtuse angle.

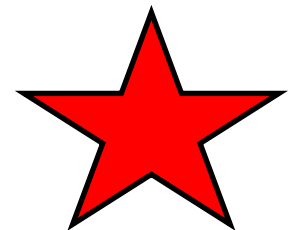

2. A triangle can have at least 2 acute angles.

3. An equilateral triangle is also equiangular.

4. A trapezoid has one pair of opposite sides that are parallel.

5. A scalene trapezoid can have right angles.
