

Factors and Multiples

Assignment Math 4

Let's look at factors and multiples in an equation.

What is a factor?

-The numbers that are multiplied to get a given number.

For example...

Find all the

Factors of 16.

16	
1	16
2	8
4	4

Ask yourself...
What factors can I multiply together to get the product??

$$1 \times 16 = 16$$

$$2 \times 8 = 16$$

$$4 \times 4 = 16$$

Factors of 16 are 1, 2, 4, 8, 16

- The first factor of every number greater than 0 is **1**.
- Factors never go beyond the number you are finding factors for.

Factors and Multiples

Assignment **Math 4**

Let's try...

Find all the factors of 18

Ask yourself...

What factors can I multiply together to get 18?

Factors of 18 are _____

Let's try...

Find all the factors of 32

Ask yourself...

What factors can I multiply together to get 32?

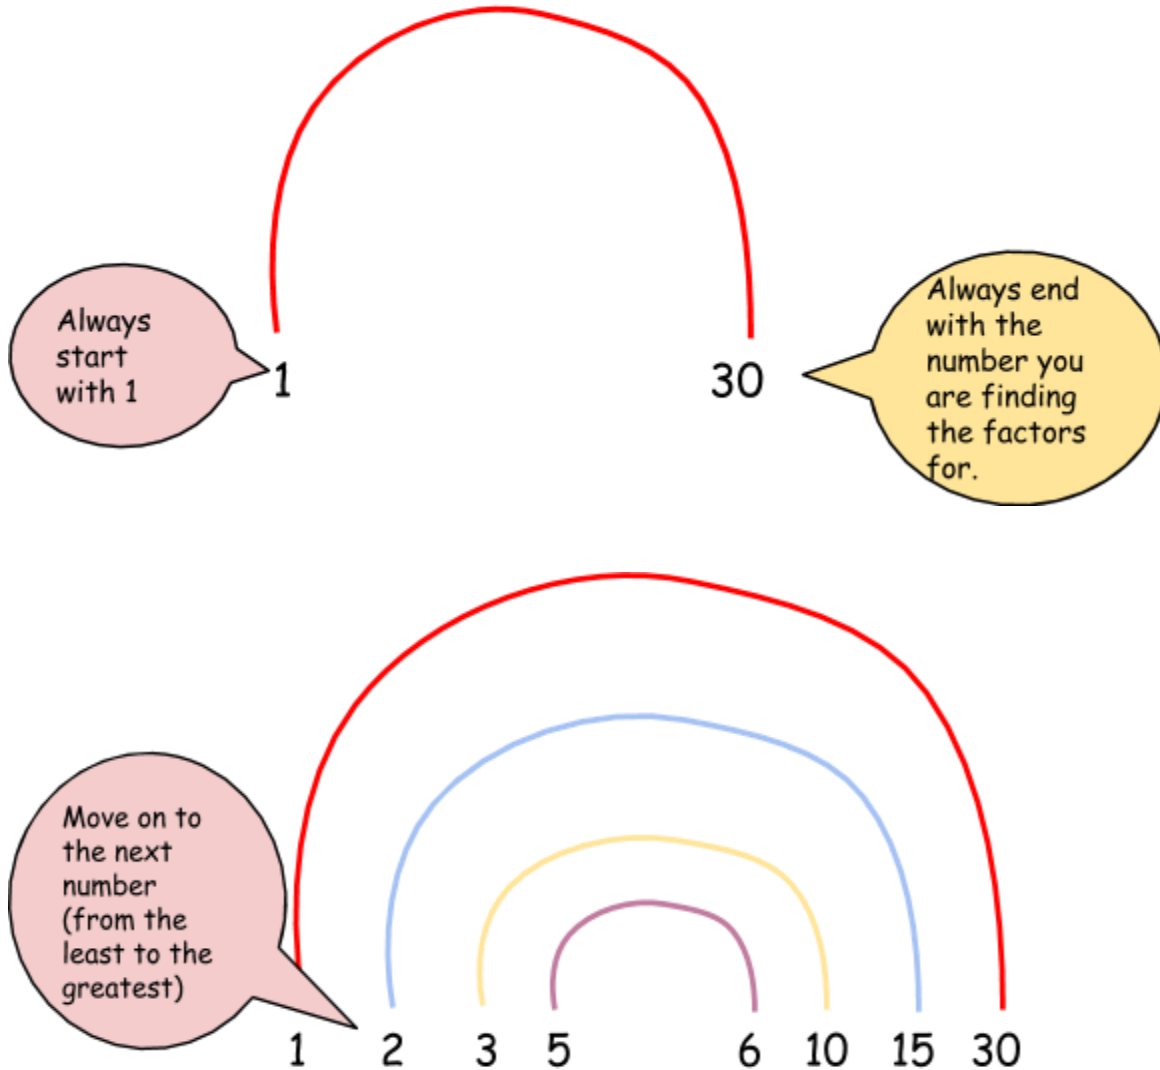

Factors of 32 are _____

Factors and Multiples

Assignment Math 4

You can draw a **Factor Rainbow** to find all the factors!

Find all the factors of 30

Factors of 30 are 1, 2, 3, 5, 6, 10, 15, 30

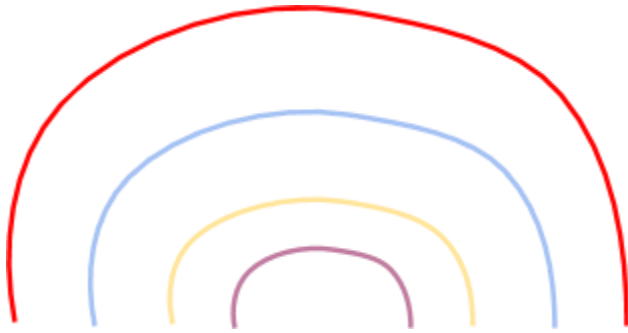

Factors and Multiples

Assignment Math 4

Let's try...

Find all the factors of 48

Let's draw a factor rainbow.

Factors of 48 are _____

Let's try...

Find all the factors of 98

Let's draw a factor rainbow.

Factors of 98 are _____

Factors and Multiples

Assignment **Math 4**

What is a multiple?

-The **product** of a given number and another factor multiplied together.

$$4 \times 1 = 4$$

For example...

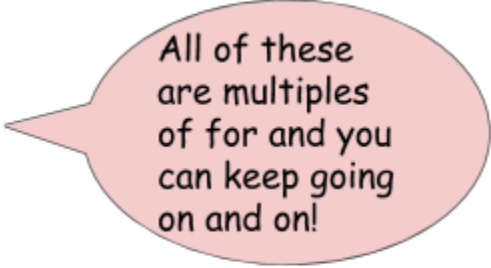

$$4 \times 2 = 8$$

What is multiples of 4?

$$4 \times 3 = 12$$

$$4 \times 4 = 16$$

$$4 \times 5 = 20$$

All of these are multiples of 4 and you can keep going on and on!

- There is **no limit** to the number of multiples a number can have.
- The first multiple of every number greater than zero is the number you are finding multiples for.

Let's try..

Find all the first 6 multiples of 6

Think this way...
Multiple = Product.
Keep multiplying until you get 6 products.

$$6 \times 1 = \underline{\quad}$$

$$6 \times 2 = \underline{\quad}$$

$$6 \times 3 = \underline{\quad}$$

$$6 \times 4 = \underline{\quad}$$

$$6 \times 5 = \underline{\quad}$$

$$6 \times 6 = \underline{\quad}$$

The first 6 multiples of 6 are _____

Factors and Multiples

Assignment **Math 4**

Let's try...

What are the first 6 multiples of 10?

$10 \times 1 = \underline{\quad}$

$10 \times 2 = \underline{\quad}$

$10 \times 3 = \underline{\quad}$

$10 \times 4 = \underline{\quad}$

$10 \times 5 = \underline{\quad}$

$10 \times 6 = \underline{\quad}$

The first 6 multiples of 10 are _____

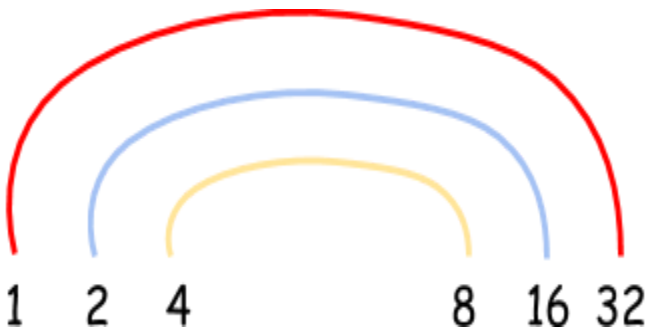

Factors and MultiplesAssignment **Math 4**

What is a factor pair?

-Factor pair of a number is two numbers that you can multiply together to get the target number.

For example...

What are the factor pairs for 32?

$$1 \times 32 = 32$$

$$2 \times 16 = 32$$

$$4 \times 8 = 32$$

Would 2 & 32 be a factor pair?
- No, because they don't make 32 when multiplied together.

Answer: 1&32, 2&16, 4&8 are the factor pairs for 32.

Factors and Multiples

Assignment Math 4

Let's try...

What are the factor pairs for 56?

_____ are the factor pairs for 56.

Let's try...

What are the factor pairs for 95?

_____ are the factor pairs for 95.

Factors and Multiples

Assignment Math 4

What is a prime number?

A prime number has only two factors: 1 and itself.

2 is a prime number

Why? 

It's because 2 has only two factors, 1 and 2.

17 is a prime number

Why? 

It's because 17 has only two factors, 1 and 17.

True or False?

"29 is a prime number."

Let's find the factors of 29 and find out if 29 is a prime number or not.

Is there any other numbers that make 29 when multiplied together?

Yes/No

The statement is _____ because _____

Factors and Multiples

Assignment **Math 4**

True or False?

"99 is a prime number."

Let's find the factors of 99 and find out if 99 is a prime number or not.

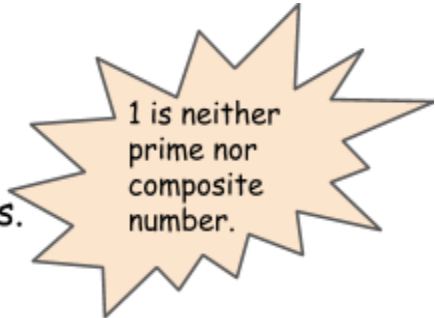

The statement is _____ because _____

Factors and Multiples

Assignment Math 4

What is a composite number?

A composite number has more than two factors.

1 is neither prime nor composite number.

9 is a composite number

Why?

It's because 9 has more than two factors.

32 is a composite number

Why?

It's because 32 has more than two factors.

True or False?

"69 is a composite number."

Let's find the factors of 69 and find out if 69 is a composite number or not.

Factors and Multiples

Assignment Math 4

The statement is _____ because _____

True or False?

"87 is a composite number."

Let's find the factors of 87 and find out if 87 is a composite number or not.

The statement is _____ because _____

Factors and Multiples

Assignment Math 4

Let's try...

Is 85 a prime or composite number?

Answer: _____

Let's try...

Is 67 a prime or composite number?

Answer:
