# The Mean and Mean Absolute Deviation Assignment Math 6

**Part 1:** Describe the following terms using your own words.

a. Mean

**Answer:**

b. Variability

**Answer:**

c. Absolute Deviation

**Answer:**

d. Mean Absolute Deviation

**Answer:**

# The Mean and Mean Absolute Deviation Assignment Math 6

## Part 2: Interpret mean of the given set of data as:

- a. Fair share
- b. Balancing Point

Tom wants to know the typical number of glasses of water his friends drink in a day.

Below are the data he collected

**6, 9, 8, 10, 7, 7, 9**

Using cubes, interpret the mean as "fair share".

### Solution:

- a. Fair Share

- b. Balancing Point

**Part 3:** Find the mean of each set of data.

a. Eggs Hens Lay
7, 6, 8, 7, 6, 8

b. Study Hours (School Days)
2, 4, 4, 2, 3, 5, 3, 1

c. GPA
87, 88, 90, 89, 86

d. Hair Length (in inches)
16, 20, 18, 17, 18, 20, 17

# The Mean and Mean Absolute Deviation Assignment Math 6

**Part 4:** Find the MAD of each set of data in **Part 3**.

a. Eggs Hens Lay
7, 6, 8, 7, 6, 8

b. Study Hours (School Days)
2, 4, 4, 2, 3, 5, 3, 1

c. GPA
87, 88, 90, 89, 86

d. Hair Length (in inches)
16, 20, 18, 17, 18, 20, 17

## The Mean and Mean Absolute Deviation Assignment Math 6

**Part 5:** Read the problem carefully, then answer the questions that follow.

The dot plots below show the different *GPA*s of 8 students from different groups.

- What is the mean *GPA* for each group?
- What is the *MAD* of each set of data?
- Which group has greater variability in the distribution?

Name: \_\_\_\_\_ Period: \_\_\_\_\_ Date: \_\_\_\_\_

## **The Mean and Mean Absolute Deviation** Assignment **Math 6**

d. Which group has lesser variability in the distribution?

e. Which distribution has the mean that is a more accurate indicator of the typical test score?
