$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean Math 6

Work in groups of 3-5 students.
Read the instructions at each station carefully.
Record the data that you collect and then find the median and mean for each set.

## Station 1 : Roll the Dice

At this station, you will take turns rolling the dice and record the rolls in the table below.

- Roll 2 dice at a time
- Record the sum of each roll in the table below
- Do this 7 times
- Now, rewrite the data in order from least to greatest
- Find the Median
- Calculate the Mean - show your calculations

| Roll \# | Value of the roll | Use space below to show your work and calculations | Order values from least to greatest to find the MEDIAN |
| :---: | :---: | :---: | :---: |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |
| 4 |  |  |  |
| 5 |  |  |  |
| 6 |  |  |  |
| 7 |  |  |  |
|  | MEAN = |  | MEDIAN = |

$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean Math 6

Station 2 : How do the pencils measure up?
At this station you and your group must measure the pencils to the nearest cm

- Record the measurement in the table
- Rewrite the lengths from least to greatest
- Find the median
- Calculate the Mean

| Pencil \# | Length in cm | Use space below to show your work and calculations | Order values from least to greatest to find the MEDIAN |
| :---: | :---: | :---: | :---: |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |
| 4 |  |  |  |
| 5 |  |  |  |
| 6 |  |  |  |
|  | MEAN $=$ |  | MEDIAN $=$ |

Do you think the mean or the median best describes the lengths of the pencils in the group?
Why?
$\qquad$ Period: $\qquad$ Date: $\qquad$ Math 6

## Station 3 : Temperature Research Station

At this station, you can each choose your own state and record the data.

- Launch the website for climate data
- Pick a state
- Record the average monthly high temperatures by month
- Rewrite it in order from least to greatest
- Find the Median (With your group, talk about how to find the middle number of 12 data points)
- Calculate the Mean

## STATE:

| Month | High <br> temperature <br> (F) | Use space below to show your work and calculations | Order values from least to greatest to find the MEDIAN |
| :---: | :---: | :---: | :---: |
| January |  |  |  |
| February |  |  |  |
| March |  |  |  |
| April |  |  |  |
| May |  |  |  |
| June |  |  |  |
| July |  |  |  |
| August |  |  |  |
| September |  |  |  |
| October |  |  |  |
| November |  |  |  |
| December |  |  |  |
|  | MEAN= |  | MEDIAN $=$ |

$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean

Station 4 : Make a basket

Now it's time to practice your shot! How many baskets can you make? Take turns shooting 7 shots in a row. Rotate through 4 times to calculate the your own median and mean

- Ball up 7 pieces of paper
- Shoot from a 5-6 ft away from the recycling bin
- Record how many baskets you make out of 7
- Do this 4 times
- Rewrite the data in order from least to greatest
- Find the Median - for your 4 turns
- Calculate the Mean

| Round \$ | Number of <br> shots made <br> out of 7 | Use space below to show your <br> work and calculations |  | Order values from <br> least to greatest to <br> find the MEDIAN |
| :---: | :--- | :---: | :---: | :--- |
| 1 |  |  |  |  |
| 2 |  |  |  |  |
| 3 |  |  |  |  |
| 4 |  |  |  |  |
|  |  |  |  |  |
|  |  |  |  |  |

Explain how you found the MEDIAN when there was an even number of values. What is the middle number?
$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean

Station 5: Rock, Paper, Scissors
Everyone likes a good game of rock, paper, scissors. Remember: Rock beats scissors, scissors beats paper, paper beats rock. Play against your partners. You can play as a whole group, or split into pairs.

- Play rock paper scissors with your partners
- If you win, you get 2 points, If you lose you get 0 points, If you tie you get 1 point
- Play a round of 5 "shoots"
- Record your score
- Play a total of 5 rounds
- Rewrite the data for your 5 rounds in order from least to greatest
- Find your Median score - (for all 5 rounds)
- Calculate your Mean score
- Compare to your partners scores

| Roundl \# | Points you earned $\mathrm{W}=2$ $\mathrm{L}=0$ $\mathrm{T}=1$ | Use space below to show your work and calculations | Order values from least to greatest to find the MEDIAN |
| :---: | :---: | :---: | :---: |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |
| 4 |  |  |  |
| 5 |  |  |  |
|  | MEAN = |  | MEDIAN = |

Compare your scores to the rest of the players in your group. What do you notice?
$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean Math 6

## Practice and Reflection

1.) For the following 2 sets of data, find the median and the mean
A)

| Test Scores | Use this space for work |  |  |  |
| :--- | :--- | :---: | :---: | :---: |
| 75 |  |  |  |  |
| 83 |  |  |  |  |
| 91 |  |  |  |  |  |
| 100 |  |  |  |  |
| 96 |  |  |  |  |

MEDIAN : $\qquad$

MEAN : $\qquad$
B)

| Number of people who ride the bus |  | Use this space for work |
| :--- | :--- | :--- |
| Mon. | 26 |  |
| Tues. | 37 |  |
| Wed. | 30 |  |
| Thurs. | 45 |  |
| Fri. | 52 |  |

## MEDIAN :

$\qquad$

MEAN : $\qquad$
$\qquad$ Period: $\qquad$ Date: $\qquad$
Stations: Get your data in order: Finding the median and mean Math 6

Use the examples from problem to help you answer the next questions
2.) When would MEAN be the best measure of average? Explain.
3.) When would MEDIAN be a better measure of average? Explain.
4.) Explain how to find the MEDIAN if the data set has an even number of values and has 2 middle numbers. Provide an example to show your reasoning.
