

**Write the appropriate equation for the following descriptions about the array below:**

- The dots grouped into four.  
 $24 \div 4 = 6$
- The total rows and columns.  
 $3 \times 8 = 24$
- Only 18 dots are red.  
 $3 \times 6 = 18$  or  $(3 \times 8) - (3 \times 2) = 18$

**Answer the situation below:**

The teacher handles 4 sections that total to 32 students. Each section has the same number of students.

- Draw an array to represent all the students.

- How many students are there in 3 sections?  
One section has  $32 \div 4 = 8$  students.  
 $8 \times 3 = 24$  students
