

Part A:

How Many Groups Will There Be?

Answer the questions below to identify how many groups there are in the expressions.

I have 3 bags of 2 candies. How many groups of 2 will there be if I add
2 more bags of 2 candies?

3 groups + _ group/s = _ groups

I have 4 cups of 3 pebbles. How many groups of 3 will
there be if I add 3 more pebbles?

4 groups + _ group/s = _ groups

I have 6 groups of 4 pencils. How many groups of 4 will there be if I
add 12 more pencils?

6 groups + _ group/s = _ groups

Part B:

Commutative & Distributive Bell Work**Math 3****Heavier Feathers or Steel?**

Count how many equations show the commutative property in the feathers and steel images. Identify which contains more correct representations of the commutative property to know what is heavier.

$$7 \times 8 = 8 \times 7$$

$$9 \times 2 = 2 \times 9$$

$$3 \times 4 = 4 \times 5$$

$$5 \times 6 = 6 \times 5$$

$$2 \times 3 = 3 \times 2$$

$$8 \times 4 = 4 \times 8$$

$$9 \times 1 = 1 \times 8$$

$$2 \times 6 = 6 \times 2$$

$$8 \times 5 = 5 \times 8$$

$$5 \times 4 = 4 \times 6$$

$$8 \times 3 = 3 \times 8$$

$$2 \times 1 = 1 \times 2$$

$$7 \times 2 = 2 \times 9$$

$$9 \times 4 = 4 \times 6$$

$$6 \times 7 = 7 \times 6$$

$$4 \times 3 = 3 \times 4$$

$$4 \times 4 = 2 \times 2$$

$$3 \times 5 = 5 \times 3$$

There are _____ equations
that show the commutative
property.

There are _____ equations
that show the commutative
property.

Encircle Which is Heavier: Feathers or Steel?
